

## Introducing Sleeve-It™

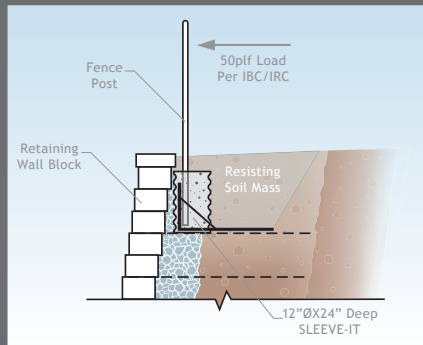

The industry's first pre-engineered fencing foundation for segmental retaining walls

Without Sleeve-It™

With Sleeve-It™

## Sleeve-It™

A code compliant, fence-post anchoring system for integrating stable fence footings into the construction of retaining walls.

### Step 1

Install the cantilevered Sleeve-It units near the elevation of the top of wall

### Step 2

Fill and compact soil up to the top of the sleeve

### Step 3

Leave the disposable lid on the sleeve until the fence installer places the fence post in the sleeve and fills with concrete

### Step 4

The fencing contractor finishes the fence, supported by the buried Sleeve-It system
